

“ Superior imaging and safer than latex based covers ”

## Transvaginal / Endocavity Probe Cover

### India's #1 Selling Endocavity Probe Cover

- Acoustically transparent provides distortion-free imaging
- Medical grade non-toxic, non-allergic translucent EVA film, Ensures superior investigative results
- EO Sterilisation for optimum safety
- Ensures perfect biosafety for the patient
- Oxo biodegradable
- With Self adhesive band for a secure fit
- Skin-feel and satin smooth material helps minimise patient trauma
- Size - 8.5 x 2.9 inch ( 216 x 75 mm )

**EVA  
PROBE  
COVER**

## Still using latex condoms or covers for transvaginal examinations?

A comprehensive study\* by Australian researchers, thoroughly evaluated and assessed the integrity of probe covers and condoms in a clinical setting. The study concluded that **non-latex probe covers like CLEARPROBE<sup>®</sup> have a lower failure rate than latex condoms for transvaginal ultrasound examination.**
